

BUSINESS PROCESS MANAGEMENT (BPM) DESIGNING YOUR BUSINESS

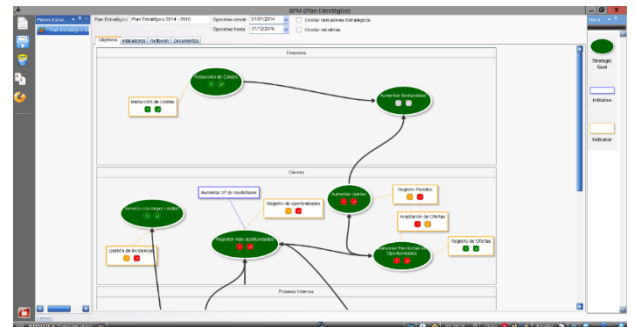

Strategic Business model (BPM)

With BPM module you can design your processes, define your objectives and measure them.

In addition, these process indicators may be aligned with the strategic objectives represented in the balance scorecards.

Workflow:

RPS is able to orchestrate all the processes of the company in a sequence of tasks defined by each role in a controlled and audited way.

Benefits

- Full orchestration of the organization's processes, involving any internal and / or external agent.
- Control of the time spent on each task of the process.
- Monitoring of strategies based on indicators and process evolution.
- Continuous improvement of the processes.
