

COST DRIVERS

CALCULATE WITH EASE UNIT COST OF YOUR PRODUCTS

The new Cost Drivers App was born from the need of many clients to have a tool that allows to automatically calculate the unit cost of their products, services or projects.

Applying the Cost Accounting methodology, and based on the information from your general and analytical accounting, the new app will allow you to define cost centers (main and auxiliary), cost objects (items or projects), establish distribution criteria (drivers) and bases.
